

Realists

Company Presentation

Apr 2023

1. Who is Realists?

Our mission, vision, values, team, history and customers

2. Why Realists?

Some facts, numbers, advantages and testimonials

3. Our Products and Services

Components, features, pathologies, applications, compatibility

4. How to work with Realists

Business models and specifications

Realists is a worldwide operating surgical training provider who offers high-class solutions in the area of spine surgery.

Our **RealSpine Training Systems** are visually and haptically highly realistic.

Together with our scientifically based **Realists Training Concept** they form a perfect unit and make every training session a successful learning experience.

Who is Realists?

Realists

Our Vision

As market leader we drive health care education to increase learners' skills and to improve patient outcomes.

Our Mission

We offer individual best-in-class solutions for healthcare education by combining state-of-the-art technology with high-level didactics for a sustainable learning experience in a realistic working environment.

Who is Realists?

Realists

Our Corporate Values

Integer

Our relationships are based on honesty, reliability and moral principles. We are fair, we walk our talk and continuously strive for long-term partnerships.

Creative

We want to make things work. On our way to optimal solutions, we think outside the box and leave beaten paths.

Independent

We trust our educational principles. We serve all partners with the same impartiality.

Sustainable

Economic, ecologic and social aspects are the compass for our actions.

Why choose Realists?

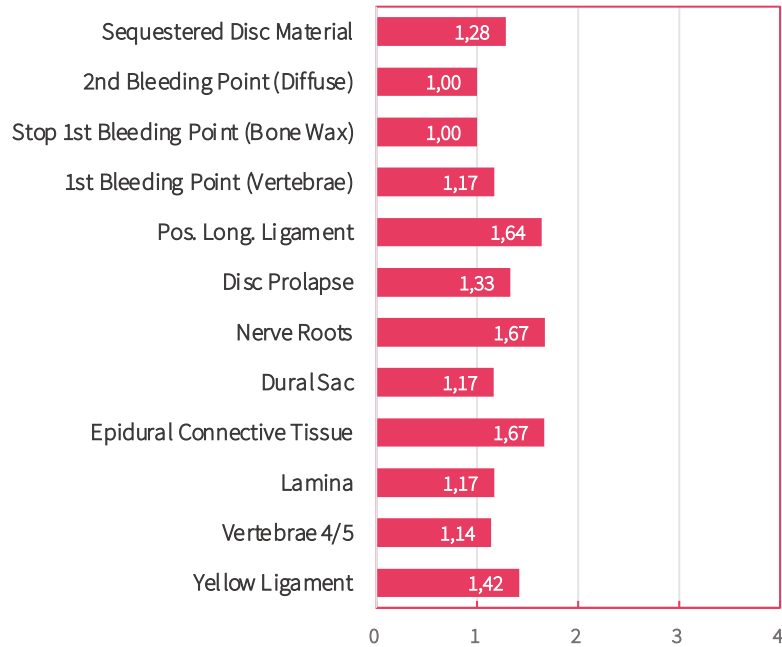

Due to our highly realistic representation of the situs

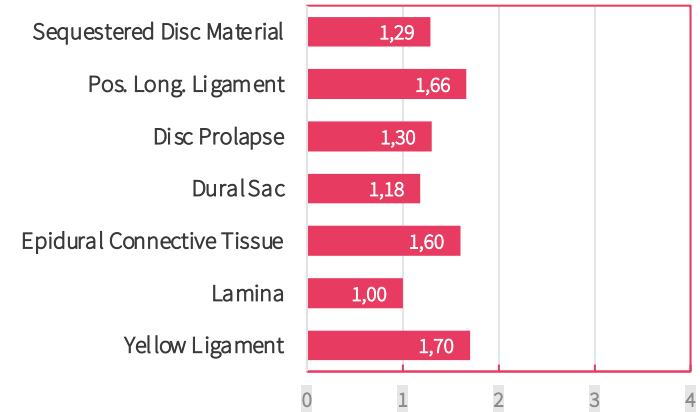

Why choose Realists?

A study with experts in the field has proven the realism of the RealSpine Training System

Visual validation

Haptic validation

The experts used a four-point forced choice scale:

- 1 – Very realistic
- 2 – Realistic
- 3 – Less realistic
- 4 – Very low realistic

Dr. Roger Härtl,
Professor of Neurological Surgery, Weill
Cornell Medicine Center for Comprehensive
Spine Care, New York, USA

“RealSpine is an excellent model for training and education. It feels like operating a real patient - its authentic anatomical structures, the pathologies, the intra-operative bleeding system make it a unique experience for every surgeon.”

Why choose Realists?

Because of the advantages we offer manufacturers of medical devices

Realists

Highlight
your product features in life-like
operation conditions

Gain more customers
with eye-catching set-ups in
congress and events

Lower costs
30% cheaper than comparable
surgical training

All inclusive
Preparation, logistics,
assessment, consulting

Compatible
with diverse technologies

Where, when and how
the training is needed

Why choose Realists?

Because of the advantages we offer manufacturers of medical devices

Effective training
skills improvement up to 25%*

All inclusive
preparation, logistics,
assessment, consulting

Time saving
minimal impact on on-call
planning

Standardization
Training on the same patient
under the same conditions

Compatible
with diverse technologies

Lower costs
30% cheaper than comparable
surgical training

competence-based learning

Realists Training Concept

The Realists Educational Concept has proven a **25%** improvement in surgical **competences** with just **one** hands-on spine training*.

REALISTS TRAINING CONCEPT

CONVENTIONAL SIMULATION BASED TRAININGS

SKILLS

Ability to apply knowledge and use know-how to complete tasks and solve problems.

KNOWLEDGE

Theoretical and/or factual knowledge contributing to the development of competencies.

ATTITUDE

Decision making on the occurrence of complications.

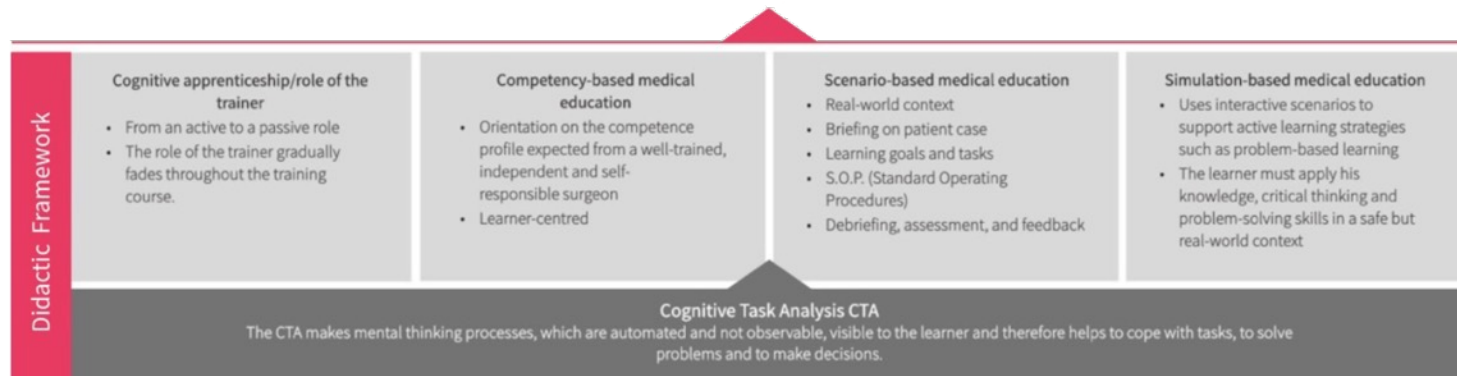

COMPETENCES

A combination of observable or measurable skills, knowledge and attitude that is necessary to perform a specific task.

Realists Training Concept

What makes RealSpine unique?

Realists

7 different models developed from actual patients

Highly realistic anatomy representation (incl. bleeding and CSF)

Compatible with different visualization systems

Training anywhere, anytime

Compatible with multiple surgical technologies

RealSpine by Realists

Set up and components

System base

1

Lifelike anatomical
interchangeable cartridge

2

Cover with skin

3

Our Portfolio

Complete solutions for spine surgery training

RealSpine

Basic MISS

- For a basic decompression of the lumbar spine
- Endoscopic / microscopic approaches

Advanced MISS

- For advanced decompression of the lumbar spine
- Endoscopic / microscopic approaches

Spondy X

- For Lumbar pedicle screw fixation
- Compatible with X-ray, surgical navigation and robotics

Spondy

- For decompression and stabilization of the lumbar spine
- Compatible with surgical navigation and robotics

SI

- For sacroiliac joint fusion
- Compatible with X-ray and surgical navigation

Lateral

- For lateral lumbar spine surgery
- ATP and Transpoas approach

Myelopathy

- For decompression and stabilization of the cervical spine
- Compatible with surgical navigation and robotics

RealImaging

Radiation-free fluoroscopy

- Radiation-free X-ray simulation for surgical training with Realists products.
- Movement of instruments and implants in real-time
- Compatible with all instruments needed for a surgical procedure
- Portable, flexible and adaptable to any space.

Realists VR

Pre- and post-op in virtual reality

- Complement your hands-on RealSpine training with a pre- and post-operative case study setup in virtual reality.
- 3D paintable anatomical models, 3D segmented patients, DICOM viewer, sample procedures, measurements, videos and more.
- Single or online multiuser sessions

What model of RealSpine is right for you?

Haptic Feedback

◐ Basic

● Advanced

Radiation-free X-ray simulation for surgical training with RealSpine.

Real-time image-guided navigation of instruments, implants, screws, and more.

Accurate simulation (less than 0.5mm deviation).

Compatible with all surgical instruments

Portable and flexible. Adaptable to any space. Use it anywhere.

Realists Reference Pointer

Realists' standard solution for precise guidance

- Guidance for precise positioning of instruments and implants
- Reference marker for position control

Part of the RealImaging package

Use of Real Surgical Instruments

Use your own instruments and see them in RealImaging.

Instrument Adaptation Process

For new instruments with which RealImaging is not yet compatible:

1. Provide instruments to Realists.
2. Realists to customize RealImaging and create instrument specific trackers
3. Return of instruments incl. trackers (trackers belong to the customer)

Tracker Production

Production of trackers for instruments with which RealImaging is already compatible.

One-time investment

Training Space

In-Hospital Training with RealSpine (example)

Mix –Bilateral decompression, TLIF and fixation with pedicle screws

Training for 6 participants

1 Group – 4 hours

2 Workstations

2 Trainers/Faculty

1 Certified RealSpine Instructor

3 participants per Workstation

3 participants share 1 module

Spinal Canal Stenosis

Spondylolisthesis

Support of Marketing Activities

Realists

You can highlight your product features with our Realists training systems for the spine. All RealSpine models are designed to be compatible with a wide variety of common medical devices and can be easily inserted with implants and screws. This makes them perfect for your next product event, whether as a webinar or in a live demonstration.

Webinars

Realists

Webinars Powered by Realists.

Realists brings a lifelike anatomical training system for spine surgery. You bring your expertise.

Dr. med. Andreas Korge
Head Physician, Spine Centre
Schön Klinik Munich, Germany

“The RealSpine Trainer is a brilliant simulation module for surgical interventions on the spine. With realistic representation of the intraoperative situs or the paravertebral and intraspinal anatomy, minimally invasive disc, decompression and fusion operations can be simulated. Defined pathologies (herniated disc, mono- and bilateral spinal stenosis, etc.) are available to both the prospective and established surgeon for minimally invasive surgery. The management of complications (dural lesion) can be trained. Realistic haptics and the use of correct surgical instruments provide an advantage over virtual reality simulations. Working with the RealSpine Training System helps to reduce intraoperative learning curves. Its use is not restricted to an actual operating environment but is guaranteed at any location.”

Realists Recycling Program

By returning the anatomical cartridges, we are able to **recycle** up to **83%** of their plastic components used during the training and reuse all other parts. The Realists Recycling Program is instrumental in reducing our environmental footprint.

All-in-One

Spine surgical training – far beyond the ordinary

Surgical Instruments

Basic surgical instrument set

Realists Visualization

2D full-HD camera incl. LED illumination for visualization of the situs and co-observation

Training Support Services

Support in the organization and implementation of the training on site or remotely

Realists

Surgical Equipment

Suction devices, surgical drills and other disposable surgical supplies

Realists Training Concept

Didactic concept for efficient learning and best possible training outcomes

Logistic Services

Providing global access to top-notch spine surgery training

Our R&D team is operating at full capacity!
